

## **Flexibility and Responsiveness**

This document contains some emails and reflections I have received from some of my team members about my flexibility and responsiveness to their needs.

I have been very fortunate to have an incredibly skilled and supportive facilitator to support my development as a technology teacher at SAS. Kris Sheehan supports every lesson I have in the tech lab and is always available to lead the instruction. This has been so helpful and instructive that I now feel I am ready to start leading some of my lessons in the lab.

I appreciate that you always come to our team meetings and are so willing and competent in adjusting projects to fit each individual teacher's needs. It helps us so much in being "the same but different!" The second grade teachers and students are lucky to have you on our team.

Responsive to teacher needs in terms of ideas on how to integrate tech, levels appropriate for students, and not only tech. Flexible with regards to teacher style, teacher level of ability, teacher ideas.

Kris has been an excellent Tech Resource Facilitator in that she attends our team meetings, listens to what we have planned and offers ideas for how we can integrate technology. She also acts as a liaison between teachers, letting us know if something great is going on in a neighbors class, or if lessons needed tweaking how it worked for someone else. She goes above and beyond the call of duty offering to share her knowledge at "Date Nights with your Mac" after school sessions, or just as a run by in the room. She is very approachable and is willing to teach and reteach in a way that does not make some us "less savvy" people afraid to ask for help. Kris is approachable, flexible and most importantly in my case "PATIENT". I feel very supported! Kathy Love

Kris is always willing to help out and adjusts her schedule accordingly to assist us with our projects. She has fabulous tech ideas to add to the grade 4 units and helps us integrate tech into our curriculum. In addition to being proactive with project ideas for our curriculum units, she is very flexible and responsive to the needs of the Grade 4 team. When we come to her with an idea or a project she jumps on board and helps make it happen. We are so grateful to have her as our tech(what is that long title again?).
